SKILLS

- Project Management
- Product Ownership
- Agile & SAFe 6
- Scope & Stakeholder Management
- Risk & Issue Management
- Team Leadership & Mentoring
- Configuration Management
- Communication Management
- Budget & Cost Management

CERTIFICATIONS

- Project Management Professional PMP®
- AI Applications in Project Management – CPMIAI - PMI
- Inhouse training on Cyber Security according to ISO 21434 and ISO 26262 – Functional Safety
- SDV: Introduction to Software Defined Vehicles

TECHNICAL SKILLS

- AUTOSAR, CAN, Ethernet
- C & Embedded C
- Scripting - CAPL, Python
- ASPICE, ISO 26262, ISO 23431

Mohan Nagaraj

PROJECT MANAGER (PMP®) | PRODUCT OWNER

AUTOMOTIVE | EMBEDDED | SDV | AUTOSAR | ADAS | BMS | AGILE

PROFESSIONAL SUMMARY

Results-driven Project Manager with 15+ years of experience in the software industry, specializing in Software Defined Vehicles, AUTOSAR, ADAS and BMS. Proven ability to lead cross functional teams, manage complex projects, and deliver high-quality software solutions in compliance with industry standards such as ASPICE and ISO 26262. Adept in Agile and SAFe frameworks with a strong track record of aligning customer needs with business objectives and delivering measurable results.

PROFESSIONAL EXPERIENCE

TrustMotion (NXP Semiconductors) – Munich, Germany

Project Manager

Feb 2023–Present

Leading AUTOSAR and high-performance ECU software platform programs, collaborate with customers, technical leads and cross functional teams to shape scope, manage dependencies, and prioritize features into the right development increments.

- Lead multiple automotive software programs supporting Software Defined Vehicle (SDV) platforms across AUTOSAR, diagnostics, and system integration domains.
- Collaborate with OEM/Teir 1 stakeholders, program sponsors, architects, and engineering teams to define program goals, priorities, delivery milestones, and release plans.
- Own program execution against Plan, ensuring delivery within scope, schedule, quality, and budget expectations.
- Establish and monitor key program metrics, identify deviations, and drive corrective actions to maintain delivery commitments.
- Coordinate cross-functional teams across software development, validation, system engineering, and integration activities.
- Manage program risks, dependencies, and escalation paths while maintaining comprehensive risk mitigation plans and issue trackers.
- Drive resource planning and alignment with business and program demand across distributed Agile/SAFe teams.
- Provide executive-level status reporting, decision support, and stakeholder communication.
- Promote process improvements, engineering best practices, and continuous improvement initiatives across teams.
- Supported ASPICE-compliant software development processes and participated in technical assessments, process reviews, and quality audits.
- Demonstrate strong leadership and communication to build stakeholder alignment at all levels.

Microfuzzy (KPIT) – Munich, Germany

Senior Technical Leader

Jan 2019–Dec 2022

Sr. Technical Lead and AUTOSAR Expert, involved in Requirements, Configuration and Integration of AUTOSAR modules for OEM ECUs. Debug, analyze and fix integration problems.

- Handling review support to team for developed modules, Quality checks and change management.
- Synchronize with project stake holders, report daily status and provide consultation

TOOLS

- JIRA, Confluence, Dashboards
- MS Project, Excel, PowerPoint (Management Reporting)
- Da Vinci, ISOLAR-A, INCA, CANoe
- Debugging Tools
- DOORS, Polarion, WindChill
- GIT & SVN
- MicroControllers: 32 Bit μ C Freescale and Infineon

LANGUAGES

English (Native or Bilingual)
German (Limited Working)

HOBBIES

- Reading Books on leadership, project management and emerging technologies
- Travelling and exploring different cultures
- Listening to podcasts on technology and business.

HOBBY PROJECTS

- SMART HOME - Intruder Alert
<https://www.youtube.com/watch?v=NUXsXL25Dn0>
- Home Automation - Amazon Echo show
<https://www.youtube.com/watch?v=S2tkfr5Zy0A>

regarding technical questions.

- Perform all the integration, debug and test activities according to planned milestone and deliveries.
- Responsible for communication, delivering the project on schedule.
- Collaborate in a team environment across engineering disciplines.
- Co-ordination work with Vehicle integrators, Vehicle Application, Testing team.
- Planning of software development activities, as well as responsibility for keeping costs, quality, and deadlines.
- Engage with OEM partner engineering teams to ensure proper processes and seamless product integration.
- Provides technical leadership in directing the efforts of the team in the development and production release of all relevant engineering deliverables in compliance with the product development process and customer expectations.
- Ensures all necessary engineering documentation and data is generated and maintained to ensure traceability and compliance to company procedures.

Bosch Engineering and Business Solutions – Bengaluru, India

Project Manager

Jul 2013–Aug 2018

- Led AUTOSAR Projects on Driver Assistance System - RADAR.
- Provided AUTOSAR training to Customers and Consultation.
- Configuration Management - SVN, GIT, DOORS, ClearQuest and JIRA.
- Own feature planning for AUTOSAR platforms, aligning software capabilities with customer requirements and program milestones.
- Partner with cross functional teams (architecture, development, test, integration) to align on design, delivery plans, and quality expectations.
- Manage and collaborate with geographically distributed teams across locations and time zones to maintain momentum and resolve issues quickly.
- International experience working with teams in various countries.

L&T Technology Services – Bengaluru, India

Software Engineer

Mar 2011–Jul 2013

- Telematics Control Unit for hybrid electric vehicle is an ECU to facilitate communication between vehicle and telematics service provider.
- Gathering the Requirement Specification for BMS and TCU.
- Developed embedded software in C for automotive control units and integration.
- Supported project execution, testing, and customer coordination.

ISM – Bengaluru, India

Embedded Engineer

Jan 2009–Feb 2011

- Worked on embedded software development.
- Responsible for development of Wrapper functions for the drivers like CAN, I2C, SPI, ADC and PWM using Embedded C for 8-bit and 32-bit microcontrollers.
- Creating sample applications to test the peripherals interfaced to the microcontrollers.

EDUCATION

B.E. Electronics & Communications - Visvesvaraya Technological University

2004 – 2008

Advanced Diploma in Embedded Software Engineering, Bangalore, India.

2008
